*People who have yet to figure out the advantages of purchasing eyeglasses online will be pleased to know that MarvelOptics.com is now offering a new guide on the easy ordering process customers can use on their website.*

People who have yet to figure out the advantages of purchasing [eyeglasses online](#) will be pleased to know that [MarvelOptics.com](#) is now offering a new guide on the easy ordering process customers can use on their website. The guide will assist customers through the steps involved with ordering glasses from the comfort of their own home. There are many advantages to purchasing prescription glasses online including saving money and having a more extensive selection to choose from.

The first step involved with choosing a new pair of prescription eyeglasses is using the filter tool. This tool will allow customers to choose the exact style of prescription eyeglasses they want. The filter tool is able to filter through men's, women's and children's glasses. From there, customers can choose to filter the appropriate price range based on a personal budget. The filter tool is highly recommended for customers who need further assistance choosing a specific prescription type, whether it be for single vision or bifocal lenses.

From there, customers will be able to view their chosen frame, up-close. The frame will be shown in full detail and customers also have an option to try them on virtually to see what the frames look like when on their face. This virtual try-on process is easy, as the only thing needed is an uploaded photo of the customer.

Once the perfect frame is selected, customers can enter their prescription and pupillary distance. MarvelOptics.com offers helpful tips on how to measure the

pupillary distance. It is more convenient for customers to know the correct measurements before purchasing a pair of prescription eyeglasses from MarvelOptics.com. With this guide on how to purchase [prescription eyeglasses](#) online, people will never go to the store to purchase them again.
